

# A DAY IN THE LIFE OF MARY

Mary wakes up every morning and checks her phone for the weather in her area using a weather app.

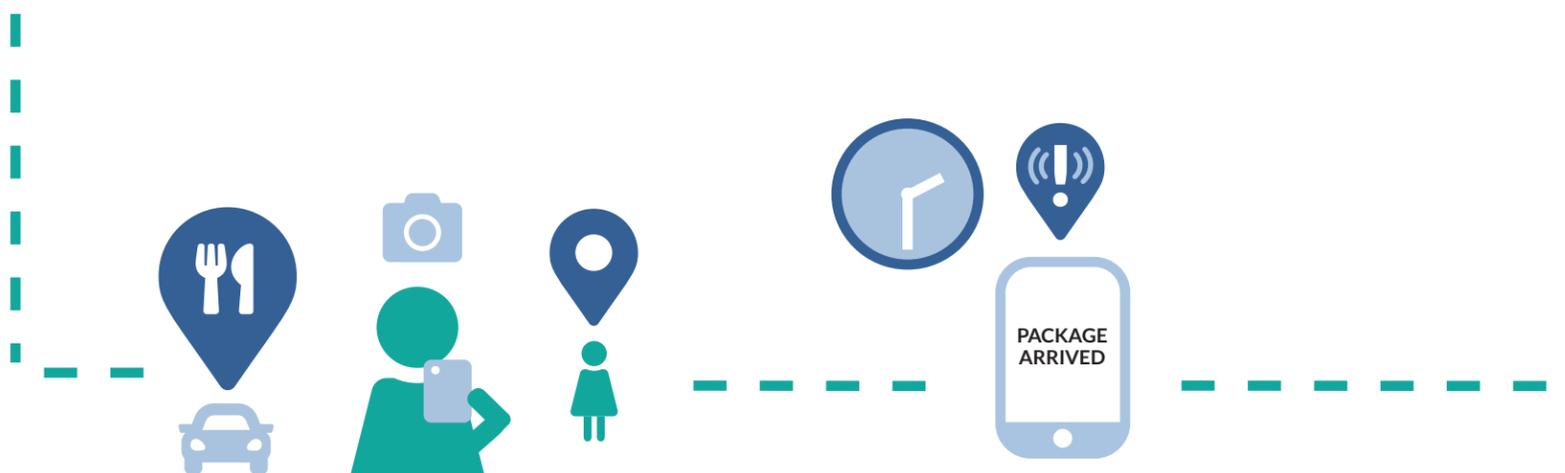

She then decides to go on a run and tracks it on her smartwatch.

At lunch, Mary orders food using a food delivery app.

Once at work, Mary checks to see if her children made it to school.

Running late from her run, Mary uses a navigation app to find the best shortcuts to work.

Once her food arrives, Mary takes a photo, posts it to social media and tags her location.

In the afternoon, Mary receives an alert to her phone from a delivery service letting her know that a package has arrived at her home.

Unable to drive her car, Mary uses a rideshare app to get home.

On her way home, Mary has car trouble and gets emergency roadside assistance.

After a busy afternoon, Mary realizes she misplaced her phone and uses the find my phone feature to locate it.
