DoD Instruction 1300.28

IN-SERVICE TRANSITION FOR TRANSGENDER SERVICE MEMBERS

Originating Component: Office of the Under Secretary of Defense for Personnel and Readiness

Effective: October 1, 2016

Approved by: Ashton Carter, Secretary of Defense

Purpose: This issuance:

- Establishes a construct by which transgender Service members may transition gender while serving.
- Enumerates prerequisites and prescribes procedures for changing a Service member’s gender marker in the Defense Enrollment Eligibility Reporting System (DEERS).
- Specifies medical treatment provisions for Active Component (AC) and Reserve Component (RC) transgender Service members.
- Implements the policies and procedures in Directive-type Memorandum 16-005.

**SECTION 1: GENERAL ISSUANCE INFORMATION**

1.1. **APPLICABILITY.** This issuance applies to OSD, the Military Departments (including the Coast Guard at all times, including when it is a Service in the Department of Homeland Security, by agreement with that Department, and in all regards, except as to the requirement to submit issuances implementing this issuance to the Office of the Under Secretary of Defense for Personnel and Readiness 30 days in advance of publication in accordance with Paragraphs 2.1c and 2.2e), the Office of the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Combatant Commands, the Office of the Inspector General of the Department of Defense, the Defense Agencies, the DoD Field Activities, and all other organizational entities within the DoD.

1.2. **POLICY.**

   a. DoD and the Military Departments will institute policies to provide Service members a process by which, while serving, they may transition gender. These policies are premised on the conclusion that open service by transgender persons who are subject to the same standards and procedures as other members with regard to their medical fitness for duty, physical fitness, uniform and grooming standards, deployability, and retention, is consistent with military service and readiness.

   b. The Military Departments and Services recognize a Service member’s gender by the member’s gender marker in the DEERS. Coincident with that gender marker, the Services apply, and the member is responsible to meet, all standards for uniforms and grooming; body composition assessment (BCA); physical readiness testing (PRT); Military Personnel Drug Abuse Testing Program (MPDATP) participation; and other military standards applied with consideration of the member’s gender. As to facilities subject to regulation by the military, the Service member will use those berthing, bathroom, and shower facilities associated with the member’s gender marker in DEERS.

   c. Service members with a diagnosis from a military medical provider indicating that gender transition is medically necessary, will be provided medical care and treatment for the diagnosed medical condition. Recommendations of a military medical provider will address the severity of the Service member’s medical condition and the urgency of any proposed medical treatment. Medical advice to commanders will be provided in a manner consistent with processes used for other medical conditions that may limit the Service member’s performance of official duties.

   d. Any medical care and treatment provided to an individual Service member in the process of gender transition will be provided in the same manner as other medical care and treatment. Nothing in this issuance will be construed to authorize a commander to deny medically necessary treatment to a Service member.

   e. Any determination that a transgender Service member is non-deployable at any time will be consistent with established Military Department and Service standards, as applied to other Service members whose deployability is similarly affected in comparable circumstances unrelated to gender transition.
f. Commanders will assess expected impacts on mission and readiness after consideration of the advice of military medical providers and will address such impacts in accordance with this issuance. In applying the tools described in this issuance, a commander will not accommodate biases against transgender individuals. If a Service member is unable to meet standards or requires an exception to policy (ETP) during a period of gender transition, all applicable tools, including the tools described in this issuance, will be available to commanders to minimize impacts to the mission and unit readiness.

g. When the military medical provider determines that a Service member’s gender transition is complete, and at a time approved by the commander in consultation with the transgender Service member, the member’s gender marker will be changed in DEERS and the Service member will be recognized in the preferred gender.
SECTION 2: RESPONSIBILITIES

2.1. UNDER SECRETARY OF DEFENSE FOR PERSONNEL AND READINESS (USD(P&R)). The USD(P&R):

   a. Updates existing DoD issuances, or promulgate new issuances, as appropriate, in accordance with the provisions of this issuance.

   b. Expeditiously develops and promulgates education and training materials to provide relevant, useful information for transgender Service members, commanders, military medical providers, and the force.

   c. Ensures that the text of proposed revisions to existing Military Department and Service regulations, policies, and guidance, and of any proposed new Military Department and Service issuance, is consistent with this issuance.

   d. Issues guidance to the Military Departments, establishing the prerequisites and procedures for changing a Service member’s gender marker in DEERS.

2.2. SECRETARIES OF THE MILITARY DEPARTMENTS AND COMMANDANT, UNITED STATES COAST GUARD (USCG). The Secretaries of the Military Departments and the Commandant, USCG:

   a. Adhere to all provisions of this issuance.

   b. Administer their respective programs, and update existing Military Department regulations, policies, and guidance, or promulgate new issuances, as appropriate, in accordance with the provisions of this issuance.

   c. Establish a Service Central Coordination Cell (SCCC) to provide multi-disciplinary (e.g., medical, legal, military personnel management) expert advice and assistance to commanders with regard to service by transgender Service members and gender transition in the military and to assist commanders in the execution of DoD, Military Department, and Service policies and procedures.

   d. Educate their AC and RC forces to ensure appropriate understanding of the policies and procedures pertaining to gender transition in the military.

   e. Submit to the USD(P&R) the text of any proposed revision to existing Military Department and Service regulations, policies, and guidance, and of any proposed new issuance, not later than 30 days in advance of the proposed publication date.

   f. Ensure the protection of personally identifiable information (PII) and personal privacy considerations in the implementation of this issuance and Military Department and Service regulations, policies, and guidance.
g. Implement processes for the assessment and oversight of compliance with DoD, Military Department, and Service policies and procedures applicable to service by transgender persons, in accordance with Paragraph 3.8 of this issuance.
SECTION 3: GENDER TRANSITION

3.1. SPECIAL MILITARY CONSIDERATIONS. Gender transition while serving in the military presents unique challenges associated with addressing the needs of the Service member in a manner consistent with military mission and readiness. Where possible, gender transition should be conducted such that a Service member would meet all applicable standards and be available for duty in the birth gender prior to a change in the member’s gender marker in DEERS and would meet all applicable standards and be available for duty in the preferred gender after the change in gender marker. Recognizing, however, that every transition is unique, the policies and procedures set forth herein provide flexibility to the Military Departments, Services, and commanders, in addressing transitions that may or may not follow this construct. These policies and procedures are applicable, in whole or in relevant part, to those Service members who intend to begin transition, are beginning transition, who already may have started transition, and who have completed gender transition and are stable in their preferred gender.

a. Medical.

(1) In accordance with DoD Instructions (DoDIs) 6025.19 and 1215.13, all Service members have a responsibility to maintain their health and fitness, meet individual medical readiness requirements, and report to their chains of command any medical (including mental health) and health issue that may affect their readiness to deploy or fitness to continue serving in an active status.

(2) Each Service member in the AC or in the Selected Reserve will, as a condition of continued participation in military service, report significant health information to their chain of command. Service members who have or have had a medical condition that may limit their performance of official duties, must consult with a military medical provider concerning their diagnosis and proposed treatment, and must notify their commanders.

(3) As in the case of other health issues, when a Service member receives a diagnosis from a military medical provider indicating that gender transition is medically necessary, the member’s notification to the commander must identify all medically necessary care and treatment that is part of the Service member’s medical treatment plan and a projected schedule for such treatment, including an estimated date for a change in the member’s gender marker in DEERS.

b. Gender Transition in the Military. Gender transition begins when a Service member receives a diagnosis from a military medical provider indicating that gender transition is medically necessary, and concludes when the Service member’s gender marker in DEERS is changed and the member is recognized in the preferred gender. At that point, the Service member will be responsible for meeting all applicable military standards in the preferred gender, and as to facilities subject to regulation by the military, will use those berthing, bathroom, and shower facilities associated with the preferred gender.

c. Continuity of Medical Care. A military medical provider may determine certain medical care and treatment to be medically necessary, even after a Service member’s gender marker is
changed in DEERS (e.g., cross-sex hormone therapy). A gender marker change does not preclude such care and treatment.

d. Living in Preferred Gender. Real Life Experience (RLE) is the phase in the gender transition process during which the individual commences living socially in the gender role consistent with their preferred gender. Although in civilian life this phase is generally categorized by living and working full-time in the preferred gender, consistent application of military standards will normally require that RLE occur in an off-duty status and away from the Service member’s place of duty, prior to the change of a gender marker in DEERS.

e. DEERS. The Military Departments and Services recognize a Service member’s gender by the member’s gender marker in DEERS. Coincident with that gender marker, the Services apply, and the member is responsible to meet, all standards for uniforms and grooming; BCA; PRT; MPDATP participation; and other military standards applied with consideration of the member’s gender. As to facilities subject to regulation by the military, the Service member will use those berthing, bathroom, and shower facilities associated with the member’s gender marker in DEERS.

f. Military Readiness. Unique to military service, the commander is responsible and accountable for the overall readiness of his or her command. The commander is also responsible for the collective morale and welfare and good order and discipline of the unit, the command climate, and for ensuring that all members of the command are treated with dignity and respect. When a commander receives any request from a Service member that entails a period of non-availability for duty (e.g., necessary medical treatment, ordinary leave, emergency leave, temporary duty, other approved absence), the commander must consider the individual need associated with the request and the needs of the command, in making a decision on that request.

3.2. ROLES AND RESPONSIBILITIES. The individual Service member, the military medical provider, the commander, and each of the Military Departments have crucial roles and responsibilities in the process of gender transition in the military.

a. Service Member’s Role.

(1) Secure a medical diagnosis from a military medical provider.

(2) Notify the commander of a diagnosis indicating that gender transition is medically necessary, and identify all medically necessary treatment that is part of the member’s medical treatment plan and a projected schedule for such treatment, including an estimated date for a change in the member’s gender marker in DEERS, as set forth in Paragraph 3.1.a.

(3) Notify the commander of any change to the medical treatment plan, the projected schedule for such treatment, or the estimated date on which the member’s gender marker would be changed in DEERS.

b. Military Medical Provider’s Role.
(1) Establish the member’s medical diagnosis, recommend medically necessary care and treatment, and, in consultation with the Service member, develop a medical treatment plan associated with the Service member’s gender transition, as set forth in Paragraph 3.1.a, for submission to the commander.

(2) In accordance with established military medical practices, advise the commander on the medical diagnosis applicable to the Service member, including the provider’s assessment of the medically necessary care and treatment, the urgency of the proposed care and treatment, the likely impact of the care and treatment on the individual’s readiness and deployability, and the scope of the human and functional support network needed to support the individual.

(3) In consultation with the Service member, formally advise the commander when the Service member’s gender transition is complete, and recommend to the commander a time at which the member’s gender marker may be changed in DEERS.

(4) Provide the Service member with medically necessary care and treatment after the member’s gender marker has been changed in DEERS.

c. Commander’s Role.

(1) Review a Service member’s request to transition gender. Ensure, as appropriate, a transition process that:

   (a) Complies with DoD, Military Department, and Service regulations, policies, and guidance.

   (b) Considers the individual facts and circumstances presented by the Service member.

   (c) Ensures military readiness by minimizing impacts to the mission (including deployment, operational, training, and exercise schedules, and critical skills availability), as well as to the morale and welfare, and good order and discipline of the unit.

   (d) Is consistent with the medical treatment plan.

   (e) Incorporates consideration of other factors, as appropriate.

(2) Coordinate with the military medical provider regarding any medical care or treatment provided to the Service member, and any medical issues that arise in the course of a Service member’s gender transition.

(3) Consult with the SCCC with regard to service by transgender Service members and gender transition in the military, the execution of DoD, Military Department, and Service policies and procedures, and assessment of the means and timing of any proposed medical care or treatment.

d. Role of the Military Department and the USCG.
(1) Establish policies and procedures in accordance with this issuance, outlining the actions a commander may take to minimize impacts to the mission and ensure continued unit readiness in the event that a transitioning individual is unable to meet standards or requires an ETP during a period of gender transition. Such policies and procedures may address the means and timing of transition, procedures for responding to a request for an ETP prior to the change of a Service member’s gender marker in DEERS, appropriate duty statuses, and tools for addressing any inability to serve throughout the gender transition process. Any such actions available to the commander will consider and balance the needs of the individual and the needs of the command in a manner comparable to the actions available to the commander in addressing comparable Service member circumstances unrelated to gender transition. Such actions may include:

(a) Adjustments to the date on which the Service member’s gender transition, or any component of the transition process, will commence.

(b) Advising the Service member of the availability of options for extended leave status or participation in other voluntary absence programs during the transition process.

(c) Arrangements for the transfer of the Service member to another organization, command, location, or duty status (e.g., Individual Ready Reserve), as appropriate, during the transition process.

(d) ETPs associated with changes in the member’s physical appearance and body composition during gender transition, such as accommodations in the application of standards for uniforms and grooming, BCA, PRT, and MPDATP participation.

(e) Establishment of, or adjustment to, local policies on the use of berthing, bathroom, and shower facilities subject to regulation by the military, during the transition process.

(f) Referral for a determination of fitness in the disability evaluation system in accordance with DoDI 1332.18.

(g) Other actions, including the initiation of administrative or other proceedings, comparable to actions that could be initiated with regard to others whose ability to serve is similarly affected for reasons unrelated to gender transition.

(2) Establish policies and procedures, consistent with this issuance, whereby a Service member’s gender marker will be changed in DEERS based on a determination by the military medical provider that the Service member’s gender transition is complete; receipt of written approval from the commander, issued in consultation with the Service member; and production by the Service member of documentation indicating gender change. Such documentation is limited to:

(a) A certified true copy of a State birth certificate reflecting the Service member’s preferred gender;
(b) A certified true copy of a court order reflecting the Service member’s preferred gender; or

(c) A United States passport reflecting the member’s preferred gender.

(3) When the Service member’s gender marker in DEERS is changed:

(a) Apply uniform standards, grooming standards, BCA standards, PRT standards, MPDATP standards, and other standards applied with consideration of the member’s gender, applicable to the Service member’s gender as reflected in DEERS.

(b) As to facilities that are subject to regulation by the military, direct the use of berthing, bathroom, and shower facilities according to the Service member’s gender marker as reflected in DEERS.

3.3. GENDER TRANSITION APPROVAL PROCESS.

a. A Service member on active duty, who receives a diagnosis from a military medical provider for which gender transition is medically necessary may, in consultation with the military medical provider and at the appropriate time, request that the commander approve:

(1) The timing of medical treatment associated with gender transition;

(2) An ETP associated with gender transition, consistent with Paragraph 3.2.d, and/or

(3) A change to the Service member’s gender marker in DEERS.

b. The commander, informed by the recommendations of the military medical provider, the SCCC, and others, as appropriate, will respond to the request within a framework that ensures readiness by minimizing impacts to the mission (including deployment, operational, training, exercise schedules, and critical skills availability), as well as to the morale and welfare and good order and discipline of the command.

c. Consistent with applicable law, regulation, and policy, the commander will:

(1) Comply with the provisions of this issuance, and with Military Department and Service regulations, policies, and guidance, and consult with the SCCC.

(2) Promptly respond to any request for medical care, as identified by the military medical provider, and ensure that such care is provided consistent with applicable regulations.

(3) Respond to any request for medical treatment or an ETP associated with gender transition, as soon as practicable, but not later than, 90 days after receiving a request determined to be complete in accordance with the provisions of this issuance and Military Department and Service regulations, policies, and guidance. The response will be in writing; include notice of any actions taken by the commander in accordance with applicable regulations, policies, and guidance and the provisions of this issuance; and will be provided to both the Service member
and their military medical provider. A request that, upon review by the commander, is determined to be incomplete, will be returned to the Service member, with written notice of the deficiencies identified, as soon as practicable, but not later than 30 days after receipt.

(4) At any time prior to the change of the Service member’s gender marker in DEERS, the commander may modify a previously approved approach to, or an ETP associated with, gender transition. A determination that modification is necessary and appropriate will be made in accordance with the procedures, and upon review and consideration of the factors set forth in Paragraph 3.2.c of this issuance. Notice of such modification will be provided to the Service member under procedures established by the Secretary of the Military Department concerned, and may include options as set forth in Paragraph 3.2.d.

(5) The commander will approve, in writing, the change of a Service member’s gender marker in DEERS, subsequent to receipt of the recommendation of the military medical provider that the member’s gender marker be changed and receipt of the requisite documentation from the Service member. Upon submission of the commander’s written approval to the appropriate personnel servicing activity, the change in the Service member’s gender marker will be entered in the database and transmitted to and updated in DEERS, under the authority, direction, and control of the Defense Manpower Data Center.

d. As authorized by Military Department and Service regulations, policies, and guidance implementing this issuance, a Service member may request review by a senior officer in the chain of command, of a subordinate commander’s decision with regard to any request under this issuance and any subsequent modifications to that decision.

3.4. ADDITIONAL RC CONSIDERATIONS.

a. General. Excepting only those special considerations set forth below, RC personnel are subject to all policies and procedures applicable to AC Service members as set forth in this issuance and in Military Department and Service regulations, policies, and guidance implementing this issuance.

b. Gender transition approach. All RC Service members (except Selected Reserve full-time support personnel) identifying as transgender individuals, will submit to, and coordinate with their chain of command, evidence of a medical evaluation that includes a medical treatment plan. Selected Reserve full-time support personnel will follow the gender transition approval process set forth in Paragraph 3.3.

c. Medical treatment plans. A medical treatment plan established by a civilian medical provider will be subject to review and approval by a military medical provider.

d. Selected Reserve Drilling Member Participation. To the greatest extent possible, commanders and Service members will address periods of non-availability for any period of military duty, paid or unpaid, during the member’s gender transition with a view to mitigating unsatisfactory participation. In accordance with DoDI 1215.13, such mitigation strategies may include:
(1) Rescheduled training.

(2) Authorized absences.

(3) Alternate training.

e. **Delayed Training Program.** Delayed Training Program personnel must be advised by recruiters and commanders of limitations resulting from being non-duty qualified. As appropriate, Service members in the Delayed Training Program may be subject to the provisions of Paragraph 3.5 of this issuance.

f. **Split Option Training.** When authorized by the Military Department concerned, Service members who elect to complete basic and specialty training over two non-consecutive periods may be subject to the provisions of Paragraph 3.5 of this issuance.

### 3.5. INITIAL ENTRY TRAINING AND CONSIDERATIONS ASSOCIATED WITH THE FIRST TERM OF SERVICE.

a. A blanket prohibition on gender transition during a Service member’s first term of service is not permissible. However, the Department recognizes that the All-Volunteer Force readiness model is largely based on those newly accessed into the military being ready and available for multiple training and deployment cycles during their first term of service. This readiness model may be taken into consideration by a commander in evaluating a request for medical care or treatment or an ETP associated with gender transition during a Service member’s first term of service. Any other facts and circumstances related to an individual Service member that impact that model will be considered by the commander as set forth in this issuance and implementing Military Department and Service regulations, policies, and guidance.

b. The following policies and procedures apply to Service members during the first term of service and will be applied to Service members with a diagnosis indicating that gender transition is medically necessary in the same manner, and to the same extent, as to Service members with other medical conditions that have a comparable impact on the member’s ability to serve:

1. A Service member is subject to separation in an entry-level status during the period of initial training (defined as 180 days per DoDI 1332.14) based on a medical condition that impairs the Service member’s ability to complete such training.

2. An individual participant is subject to separation from the Reserve Officers’ Training Corps in accordance with DoDI 1215.08, or from a Service Academy in accordance with DoDI 1322.22, based on a medical condition that impairs the individual’s ability to complete such training or to access into the Armed Forces, under the same terms and conditions applicable to participants in comparable circumstances not related to transgender persons or gender transition. As with all cadets or midshipmen who experience a medical condition while in the Reserve Officers’ Training Corps Program or at a Service Academy, each situation is unique and will be evaluated based on its individual circumstances; however, the individual will be required
to meet medical accession standards as a prerequisite to graduation and appointment in the Armed Forces.

(3) A Service member is subject to administrative separation for a fraudulent or erroneous enlistment or induction when warranted and in accordance with DoDI 1332.14, based on any deliberate material misrepresentation, omission, or concealment of a fact, including a medical condition, that if known at the time of enlistment, induction, or entry into a period of military service, might have resulted in rejection.

(4) If a Service member requests non-urgent medical treatment or an ETP associated with gender transition during the first term of service, including during periods of initial entry training in excess of 180 days, the commander may give the factors set forth in Paragraph 3.5.a significant weight in considering and balancing the individual need associated with the request and the needs of the command, in determining when such treatment, or whether such ETP may commence in accordance with Paragraph 3.2.d.

3.6. PROTECTION OF PII AND PROTECTED HEALTH INFORMATION.

a. In accordance with DoDD 5400.11, in cases in which there is a need to collect, use, maintain, or disseminate PII in furtherance of this issuance or Military Department and Service regulations, policies, or guidance, the Military Departments and the USCG will protect against unwarranted invasions of personal privacy and the unauthorized disclosure of such PII. The Military Departments and the USCG will maintain such PII so as to protect individual’s rights, consistent with federal law, regulation, and policy.

b. Disclosure of protected health information will be consistent with DoD 6025.18-R.

3.7. PERSONAL PRIVACY CONSIDERATIONS. A commander may employ reasonable accommodations to respect the privacy interests of Service members.

3.8. ASSESSMENT AND OVERSIGHT OF COMPLIANCE.

a. The Secretaries of the Military Departments and the Commandant, USCG, will implement processes for the assessment and oversight of compliance with DoD, Military Department, and Service policies and procedures applicable to service by transgender persons.

b. Beginning in 2018 and no less frequently than triennially thereafter, Secretaries of the Military Departments and the Commandant, USCG, will direct an Inspector General Special Inspection of compliance with this issuance and implementing Military Department or USCG regulations, policies, and guidance. The directing official will review the Report of Inspection for purposes of assessing and overseeing compliance; identifying compliance deficiencies, if any; timely initiating corrective action, as appropriate; and deriving best practices and lessons learned.
Glossary

G.1. Acronyms.

AC   Active Component
BCA  body composition assessment
DEERS Defense Enrollment Eligibility Reporting System
DoDI DoD instruction
ETP  exception to policy
MPDATP military personnel drug abuse testing program
PII  personally identifiable information
PRT  physical readiness testing
RLE  real life experience
RC   Reserve Component
SCCC Service Central Coordination Cell
USCG United States Coast Guard
USD(P&R) Under Secretary of Defense for Personnel and Readiness

G.2. Definitions. Unless otherwise noted, these terms and their definitions are for the purpose of this issuance.

cross-sex hormone therapy. The use of feminizing hormones in an individual assigned male at birth based on traditional biological indicators or the use of masculinizing hormones in an individual assigned female at birth. A common medical treatment associated with gender transition.

gender marker. Data element in DEERS that identifies a Service member’s gender. A Service member is expected to adhere to all military standards associated with the member’s gender marker in DEERS and use military berthing, bathroom, and shower facilities in accordance with the DEERS gender marker.
gender transition is complete. A Service member has completed the medical care identified or approved by a military medical provider in a documented medical treatment plan as necessary to achieve stability in the preferred gender.

gender transition process. Gender transition in the military begins when a Service member receives a diagnosis from a military medical provider indicating that the member’s gender transition is medically necessary, and concludes when the Service member’s gender marker in DEERS is changed and the member is recognized in the preferred gender.

human and functional support network. Support network for a Service member that may be informal (e.g., friends, family, co-workers, social media.) or formal (e.g., medical professionals, counselors, clergy).

medically necessary. Those health-care services or supplies necessary to prevent, diagnose, or treat an illness, injury, condition, disease, or its symptoms, and that meet accepted standards of medicine.

non-urgent medical care. The care required to diagnose and treat problems that are not life or limb threatening or that do not require immediate attention.

preferred gender. The gender in which a transgender Service member will be recognized when that member’s gender transition is complete and the member’s gender marker in DEERS is changed.

RLE. The phase in the gender transition process during which the individual commences living socially in the gender role consistent with their preferred gender. RLE may or may not be preceded by the commencement of cross-sex hormone therapy, depending on the medical treatment associated with the individual Service member’s gender transition. The RLE phase is also a necessary precursor to certain medical procedures, including gender transition surgery. RLE generally encompasses dressing in the new gender, as well as using preferred gender berthing, bathroom, and shower facilities.

SCCC. Service-level cell of experts created to provide multi-disciplinary (e.g., medical, legal) advice and assistance to commanders with regard to service by transgender Service members and gender transition in the military.

stable in the preferred gender. Medical care identified or approved by a military medical provider in a documented medical treatment plan is complete, no functional limitations or complications persist, and the individual is not experiencing clinically significant distress or impairment in social, occupational, or other important areas of functioning. Continuing medical care, including but not limited to cross-sex hormone therapy, may be required to maintain a state of stability.

transgender Service member. A Service member who has received a medical diagnosis indicating that gender transition is medically necessary, including any Service member who intends to begin transition, is undergoing transition, or has completed transition and is stable in the preferred gender.
transition. Period of time when individuals change from the gender role associated with their sex assigned at birth to a different gender role. For many people, this involves learning how to live socially in another gender role; for others this means finding a gender role and expression that are most comfortable for them. Transition may or may not include feminization or masculinization of the body through cross-sex hormone therapy or other medical procedures. The nature and duration of transition are variable and individualized.

urgent medical care. The care needed to diagnose and treat serious or acute medical conditions that pose no immediate threat to life and health, but require medical attention within 24 hours.
